

Lynch Fluid Controls Inc. is a manufacturer of high quality fluid power components located in Mississauga, Ontario. We were established in 1987 and have been gaining recognition in many countries as a source of fluid power products.

From our home in Mississauga, we design, manufacture and export hydraulic manifolds, valve systems, electronics and a growing selection of products that have been created by our first class team. Our exclusive distribution arrangement with Sun Hydraulics has been the backbone in our manifold manufacturing division. We have been able to take cartridge valve integration to a new level, and are now suppliers to many well recognized fluid power establishments and OEM's. We now routinely design manifolds for the world market that interface with many manufacturers, fluids, materials and applications.

We are growing and currently looking for a **CNC Programmer** to join our dynamic team. If you are a positive and driven individual with a passion for quality and a desire to make a positive impact to the success of our company, then we want to hear from you!

JOB SUMMARY:

Required to create milling and turning CNC part programs, utilizing multi-axis CAM technology.

RESPONSIBILITIES:

- Creation of part programs in support of production activities
- Update and correct part programs for prototype designs and repeat jobs
- Resolve programming related issues in accordance to our ISO9001 and AS9100 procedures
